Political Director

# THE PENNSYLVANIA ENVIRONMENTAL SCORECARD IS A JOINT PROJECT OF CONSERVATION VOTERS OF PA, CLEAN WATER ACTION, PENNENVIRONMENT, AND SIERRA CLUB PENNSYLVANIA CHAPTER.

Pennsylvania's constitution guarantees our right to a clean and healthy environment, yet our Commonwealth ranks as the third-highest emitter of climate pollution in the nation and has the third-highest rate of cancer. Our rates of lung diseases like asthma remain far above the national average. Many of our counties rank among the worst communities in America for air pollution and more than a third of our lakes and a fifth of our streams are considered greatly impaired. PFAS chemicals and fracking pose existential threats to our water and the families that rely on it. Our schools, homes, and hospitals are often in the projected blast zone of gas pipelines and oil trains. On top of all of those threats to our health, in 2020 our Commonwealth faced the COVID-19 pandemic, a disease exacerbated by asthma and lung disease. And as always, these threats fall disproportionately on the Black, Brown and low-income communities often forced to live next door to the worst sources of pollution.

Rather than dealing with those myriad issues, the Pennsylvania General Assembly instead spent the last two years seeking to derail the agencies that protect our environment and health, to promote and incentivize more fracking and more plastic, and to roll back or eliminate vital environmental laws and regulations.

Too often, the general public does not know about the environmental attacks that take place each session in the Pennsylvania General Assembly. Our organizations believe that democracy works best when the electorate understands the crucial legislation that impacts our families, our air, our water, and our health, and uses that information to engage their elected officials and hold those leaders accountable.

Towards these goals, our organizations present the 2019-2020 Pennsylvania Environmental Scorecard, which compiles the most crucial environmental votes that the Pennsylvania General Assembly took during the current legislative session. To compile this list, our organizations worked with dozens of other environmental advocates, activists, and leaders to ensure that we are reviewing and scoring the most important and highly watched environmental votes.

Prior to each vote, our organizations work together to make sure that legislators understand the environmental impacts of the legislation in question and know how to best cast their votes for the environment. This includes direct conversations with legislators and their staff, calls and emails from the members of our organizations and the general public, position papers explaining the legislation in question, and other modes of communication.

A lifetime score was also given for each legislator. This score reflects their proenvironment voting record going back to the 2007-2008 legislative session. This adds greater context to each legislator's position on environmental issues over time.

#### The 2019-2020 legislature was marked by an influx of 49 new legislators, including a record number of women and environmental champions.

They brought fresh and critical voices to fights around water contamination from lead, air pollution caused by methane and carbon emissions, and the many other environmental issues facing Pennsylvania. That growing bloc of environmental legislators succeeded in defending against dozens of attacks on our existing environmental laws, however anti-environmental leadership in both the House and Senate made it difficult to pass any new, pro-environmental policies.

The majority of the votes scored in the Pennsylvania House of Representatives centered on the recurring and misleading idea of "regulatory reform." The real goal of these bills was to inject politics into an environmental regulatory process that is currently based on science. If all of these bills had become law, any single legislator would have had the power to unilaterally block any needed environmental regulation. The House also voted to block Pennsylvania's ability to reduce carbon emissions by joining the successful Regional Greenhouse Gas Initiative, meanwhile bailing out the struggling petrochemical industry with hundreds of millions of dollars in tax credits.

The majority of the votes scored in the Pennsylvania State Senate dealt with making it easier for the oil and gas industry to operate in the state. This included dangerous bills to rollback regulations for conventional oil and gas operations to outdated standards from the 1980s and to significantly weaken the Clean Streams Law by altering what is legally considered "pollution."

In perhaps its most egregious move of the session, at the height of the COVID-19 and economic crises, both chambers passed a bill providing hundreds of millions of dollars in taxpayer funded giveaways to some of the world's largest and wealthiest corporations to build petrochemical plants, incentivizing more fracking and plastics pollution. After vetoing the initial effort. Governor Wolf negotiated a backroom deal to revive this policy as part of legislation that would reduce financial burdens on volunteer service providers, like EMS. fire, and rescue companies, putting many legislators in the difficult position of choosing to vote for the environment or for first responders. Environmental champions in both chambers attempted to amend this legislation to minimize its environmental impacts, but in the end, far too many legislators voted for these bills.

The 2019-2020 legislative session was bad, but could have been much worse. It was Pennsylvanians, armed with the knowledge of their legislators' actions and willing to step up and fight for a cleaner future, who stopped the worst bills and set the stage for real progress in the next session. We hope that this scorecard becomes another tool that they can use to create a better Pennsylvania.

#### **BILL DESCRIPTIONS**

#### **HOUSE BILL 430**

**Final Passage** 4/30/2019

Passed in the House (105-90) Awaiting action in the Senate

Makes it easy to get rid of existing pollution regulations and almost impossible to create new ones. This bill disrupts the process for implementing environmental protections, while creating new mechanisms for elected officials to repeal existing environmental regulations that have already been through an intensive regulatory review process.

The Pro-Environment vote is "No".

#### **HOUSE BILL 732**

Vote on the Motion 7/14/2020

Failed in the House (112-89)

Procedural vote to suspend the rules so HB 732 (establishing a petrochemical tax credit) could be amended to include community and environmental protections.

The Pro-Environment Vote is "Yes".

#### **HOUSE BILL 509**

**Final Passage** 4/30/2019

Passed in the House (109-86) Awaiting action in the Senate

Takes the authority to issue environmental permits away from scientists at the Department of Environmental Protection and instead allows polluting companies to choose and hire their own unaccountable private permit reviewers.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 762**

**Final Passage** 4/30/2019

Passed in the House (102-94) Awaiting action in the Senate

Creates a "regulatory compliance officer" to arbitrarily establish policies for waiving fines or penalties for gas and oil industry violations. This would prevent enforcement and shield polluters from being held accountable.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 732**

Final Passage 7/13/2020

Passed in the Senate (40-9), 7/14/20 Concurred in the House (163-38), 7/14/20

Amended to include a \$670 million, 25-year tax credit for petrochemical and fertilizer manufacturing facilities that use natural gas produced in Pennsylvania. This bill would subsidize the fracking industry and aid the development of new sources of pollution across the state.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 806**

Final Passage 4/30/19

Passed in the House (102-91) Awaiting action in the Senate

Gives politicians the authority to override new environmental regulations, threatening the Department of Environmental Protection's ability to set much-needed protections. This bill would take decision-making power away from scientists and give it to politicians.

#### **BILL DESCRIPTIONS**

#### **HOUSE BILL 1083**

Vote on the Motion 5/28/20

Failed in the House (110-92)

Procedural vote that removes language from one of the 2020 budget bills that would prohibit municipalities from banning or creating a fee for single use plastics.

The Pro-Environment Vote is "Yes".

#### **HOUSE BILL 2025**

Final Passage 7/8/20

Passed in the House (130-71) Awaiting action in the Senate

Prevents Pennsylvania from regulating carbon pollution and joining the Regional Greenhouse Gas Initiative, costing the state hundreds of millions of dollars and exacerbating the climate crisis. Also revokes the existing authority of the Department of Environmental Protection to regulate greenhouse gasses.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 1100**

Final Passage 9/19/19

Passed in the House (139-46), 2/4/20 Passed in the Senate (39-11), 2/4/20 Concurred in the House (157-35), 3/27/20 Vetoed by the Governor

Provides hundreds of millions of dollars in taxpayer funded subsidies to some of the world's largest corporations to build petrochemical plants, incentivizing more fracking and plastics pollution. Though the Governor vetoed this bill initially, it was revived through amendments to House Bill 732.

The Pro-Environment Vote is "No".

#### **SENATE BILL 327**

Final Passage 4/7/20

Passed in the House (108-93), 4/15/20 Concurred in the Senate (29-21), 4/21/20 Concurred in the House (108-94), 5/13/20 Concurred in the Senate (28-20), 5/14/20 Concurred in the House (108-94), 5/19/20 Vetoed by the Governor

Amended to halt the implementation of any environmental regulations while the COVID-19 emergency order was in place for Pennsylvania. This would halt the Department of Environmental Protection's ability to set much-needed regulations for air, water, and climate pollution, even though pollution-caused diseases like lung cancer and asthma exacerbate the dangers of COVID-19.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 1822**

Final Passage 4/21/20

Passed in the House (105-97) Awaiting action in the Senate

Amended to halt funding for some of Pennsylvanian's most important environmental programs, including programs that preserve the state's threatened family farms, fund state and local parks, support local recycling programs, and help protect and restore Pennsylvania's rivers and streams.

The Pro-Environment Vote is "No".

#### **SENATE BILL 790**

Final Passage 10/21/20

Passed in the Senate (26-23), 5/27/20 Passed in the House (109-93), 5/27/20 Awaiting action in the Senate

Rolls back regulations for conventional oil and gas drilling operations to outdated standards from the 1980's, including allowing well operators to replace peoples' drinking water they contaminated with a source that does not meet safe drinking water standards.

#### BILL DESCRIPTIONS

#### **HOUSE BILL 1100**

Final Passage 9/19/19

Passed in the House (139-46), 2/4/20 Passed in the Senate (39-11), 2/4/20 Concurred in the House (157-35), 3/27/20 Vetoed by the Governor

Provides hundreds of millions of dollars in taxpayer funded subsidies to some of the world's largest corporations to build petrochemical plants, incentivizing more fracking and plastics pollution. Though the Governor vetoed this bill initially, it was revived through amendments to House Bill 732.

The Pro-Environment Vote is "No".

#### **SENATE BILL 398**

**Final Passage** 10/22/2019

Passed in the Senate (27-22) Awaiting action in the House

Prohibits state agencies from explaining what newly proposed regulations would do or why they are needed, hampering the public's ability to understand future proposals and in turn, their ability to participate in environmental policy proposals.

The Pro-Environment Vote is "No".

#### **SENATE BILL 327**

Final Passage 4/7/20

Passed in the House (108-93), 4/15/20 Concurred in the Senate (29-21), 4/21/20 Concurred in the House (108-94), 5/13/20 Concurred in the Senate (28-20), 5/14/20 Concurred in the House (108-94), 5/19/20 Vetoed by the Governor

Amended to halt the implementation of any environmental regulations while the COVID-19 emergency order was in place for Pennsylvania. This would halt the Department of Environmental Protection's ability to set much-needed regulations for air, water, and climate pollution, even though pollution-caused diseases like lung cancer and asthma exacerbate the dangers of COVID-19.

The Pro-Environment Vote is "No".

#### **SENATE BILL 619**

**Final Passage** 6/26/2019

Passed in the Senate (26-24) Awaiting action in the House

Lets polluters off the hook for many discharges and spills by changing the definition of "pollution" in the Clean Streams Law. If the spill or discharge is diluted enough by a stream, Senate Bill 619 mandates that it does not need to be reported to the Pennsylvania Department of Environmental Protection or to downstream users.

#### BILL DESCRIPTIONS

#### **HOUSE BILL 732**

Final Passage 7/13/2020

Passed in the Senate (40-9), 7/14/20 Concurred in the House (163-38), 7/14/20

Amended to include a \$670 million, 25-year tax credit for petrochemical and fertilizer manufacturing facilities that use natural gas produced in Pennsylvania. This bill would subsidize the fracking industry and aid the development of new sources of pollution across the state.

The Pro-Environment Vote is "No".

#### **HOUSE BILL 732**

Muth Amendment A 06687 7/13/2020

Failed in the Senate (30-19)

Amended to require petrochemical manufacturers receiving the tax credit and their upstream natural gas supply companies to submit plans to achieve net zero greenhouse gas emissions.

The Pro-Environment Vote is "Yes".

#### **HOUSE BILL 732**

Muth Amendment A 06683 7/13/2020

Failed in the Senate (29-20)

Amended to require a pre-tax credit environmental impact study on the production and use of fossil fuels in Pennsylvania and its impacts on air quality, carbon emissions, water quality, and public health.

The Pro-Environment Vote is "Yes".

#### **SENATE BILL 790**

Final Passage 10/21/20

Passed in the Senate (26-23), 5/27/20 Passed in the House (109-93), 5/27/20 Awaiting action in the Senate

Rolls back regulations for conventional oil and gas drilling operations to outdated standards from the 1980's, including allowing well operators to replace peoples' drinking water they contaminated with a source that does not meet safe drinking water standards.

The Pennsylvania General Assembly spent the last two years seeking to derail the agencies that protect our environment and health, to promote and incentivize more fracking and more plastic, and to roll back or eliminate vital environmental laws and regulations."

Photo Credit: Nicholas A. Tonelli

Democracy works best when the public is informed about crucial votes that affect them and our environment—and can use the information to engage their elected leaders and hold them accountable."
