

Investing in Pennsylvania's Environment

To pass pro-environment laws, we must first elect and support pro-environment lawmakers. That's why the Pennsylvania Chapter of the Sierra Club and Conservation Voters of PA established the **Pennsylvania Environmental Donor Table** - to invest directly in electing pro-environment legislators who will be the best stewards of our air, water, and land.

WHO WE ARE

Putting Pennsylvanians before polluters.

Pennsylvania's Environmental Donor Table is a select group of committed Sierra Club and CVPA donors who each contribute \$10,000 annually.

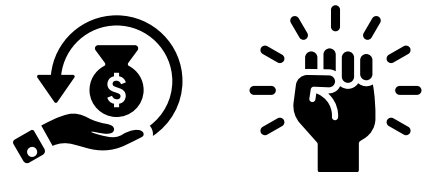

Members gain access to exclusive polling and insider political intel, and work together to strategically direct funds to pro-environment, pro-democracy candidates for state office. Members also directly interview candidates and collectively decide who receives their support.

It's a simple, powerful, and effective way to maximize the impact of your political and environmental giving.

WHAT WE DO

Invest Strategically

Our team of political experts identifies candidates for investment in key target districts who share our values and who will take bold action to protect our environment and democracy in Harrisburg and beyond, building a bench of environmental champions at every level of government.

Empower Changemakers

Since 2018, the Donor Table has invested more than \$1,000,000 and helped flip or hold 14 seats for pro-environment candidates in the PA state House and Senate, as well as made investments in other statewide and municipal races.

YOU Can Help Fight for a Better Future Today

Running for office takes resources. Our billionaire opponents have nearly unlimited funds to influence elections and, in turn, policy in Harrisburg. While essential, our team knows that it takes more than just money to succeed — and, based on a 2025 CVPA poll, we have the will of Pennsylvanians on our side. PA Voters, including swing voters, overwhelmingly want to protect our air, land and water. **But to build a strong economy and safeguard our environment, we must invest in a better future now.**

Electing PA's Environmental Champions

HOW WE DO IT

Pennsylvania's Environmental Donor Table brings together a network of influential political philanthropists who are committed to protecting Pennsylvania's environment and democracy — while wielding real power to shape statewide outcomes.

Our team of political strategists analyzes competitive districts across the Commonwealth, identifying key opportunities to flip or defend seats in the legislature and unlock progress on climate, clean air and water, and good governance.

We make early, targeted investments in candidates, leadership PACs, and statewide elections, including for Governor, to ensure that pro-environment champions have the support they need to win and deliver for Pennsylvanians.

Donor Table members also meet throughout the year, both virtually and in person, as their availability allows for exclusive briefings with pollsters, elected officials, and political experts. Members participate in candidate interviews, and help determine strategic funding decisions that drive real electoral impact.

Together, we are building political power for the long haul. Because the future of Pennsylvania's environment — and our democracy itself — depends on us acting now.
